WORK EXPERIENCE

Freelancer · Designer & Developer Jun 2023 – Present

- Worked together with a small team as designer and developer of a contract management web app, cutting down contract retrieval times by 40%. Utilized MUI, React, and Node.js.
- Currently developing a React Native/Expo app.
- Working on a React and Tailwind CSS website for an artist, focusing on an immersive digital gallery experience.
- Increased client website traffic by 30% within three months through SEO optimization and responsive design improvements.

Accenture Brasil · Digital Tech Developer Analyst Jan 2022 – May 2023

- Developed foundational code for web applications, focused on robust functionality and user-centric design.
- Successfully debugged and fixed numerous issues, greatly improving application quality and user satisfaction.
- Implemented a variety of quality-of-life features, directly contributing to an improved user experience and operational efficiency.

REsight · Frontend Developer Dec 2019 – Dec 2021

- As a React.js developer, I developed a React Native application and React website, promoting cohesive user experiences.
- Enabled offline data access and synchronization in apps using SQLite.
- Designed a custom component library with styled-components for a consistent user interface.
- Optimized performance, reducing data processing time by over 60%, and ensured app's intuitive use and visual appeal.
- Collaborated closely with designers to ensure the app was intuitive and visually appealing.
